#### Opinion

## SUMMARY RATING RATIONALE

On 11 May we upgraded Sparebanken Vest's long-term deposit and senior unsecured debt ratings to A1 from A2, we also affirmed the baa1 baseline credit assessment (BCA), adjusted BCA baa1, Baa2 senior subordinated rating, Baa3 junior subordinated rating and Prime-1 short term rating.

The affirmation of Sparebanken Vest's BCA of baa1 primarily reflects the bank's strong regional retail franchise and capital metrics and its improving asset quality. These factors counterbalance the bank's high loan-risk concentrations to historically volatile sectors, including commercial real estate and construction. The upgrade of the bank's deposit and senior unsecured debt ratings to A1 from A2 takes into account the LGF analysis of the bank's own volume of deposits and senior unsecured debt, and the volume of securities subordinated to them, which offsets the decrease in government support assumptions. Sparebanken Vest benefits from a large volume of deposits and substantial layers of subordination, resulting in very low loss given failure.

### SPAREBANKEN VEST'S BCA IS SUPPORTED BY ITS VERY STRONG- MACRO PROFILE

As a pure domestic bank, Sparebanken Vest's Macro Profile is aligned with that of Norway at Very Strong-. Norwegian banks benefit from operating in an affluent and developed country with very high economic, institutional and government financial strength as well as low susceptibility to event risk. The main risks to the system stem from a high level of household indebtedness and domestic banks' reliance on market funding. However, these risks are offset by the strength of households' ability to service debt, banks' adequate capitalisation and the relatively small size of the banking system compared to GDP.

### Rating Drivers

- Strong capital metrics
- Asset quality currently sound, but sizeable exposures to more volatile sectors pose downside risks
- Mild deterioration in profitability caused by renewed margin pressure
- Reliance on market funding renders the bank vulnerable to fluctuations in investor sentiment
- Large volume of deposits and junior debt resulting in deposit ratings benefiting from a very low loss-given-failure rate and a two-notch uplift from the BCA
- Moderate probability of government support resulting in the debt and deposit ratings benefiting from a one-notch uplift from the BCA

### Rating Outlook

The stable outlooks on the bank's long-term senior debt and deposit ratings reflect our view that the bank's financial will remain broadly resilient in the face of a modest slowdown in Norway's still strong economic performance.

### What Could Change the Rating - Up

Upward rating momentum could develop if Sparebanken Vest demonstrates (1) sustained good asset quality in its retail and corporate loan books, including in the more volatile segments, (2) continued good access to capital markets and improved liquidity, and/or (3) stronger earnings generation without an increase in its risk profile.

### What Could Change the Rating - Down

Future downward rating pressure would develop on Sparebanken Vest's ratings if: (1) the credit quality in its loan book weakens beyond our expectations, (2) profitability deteriorates; and/or (3) Sparebanken Vest fails to sustain its market position and/or (4) macroeconomic environment deteriorates more than estimated, leading to adverse developments in the Norwegian real-estate market.

## DETAILED RATING CONSIDERATIONS

### STRONG CAPITAL METRICS

Sparebanken Vest reported a Tangible Common Equity (TCE) to risk weighted assets(RWA) ratio of 12.6% at

December 2014 (including Basel I floor), already in excess of the 11% minimum regulatory requirement that will come into force 1 July 2015. The bank aims to be capitalised on par with the country's biggest institutions, and hence it has increased its goal for the Core Equity Tier 1 ratio to 13.5% by 2016. The Capital score reflects this strength as well as the bank's TCE-to-tangible banking assets ratio of 6.67%, which is well in line with international requirements.

#### ASSET QUALITY IS CURRENTLY SOUND, BUT SIZEABLE EXPOSURES TO MORE VOLATILE SECTORS POSE DOWNSIDE RISKS

Asset quality is strong and the bank's problem loan ratio (as measured by impaired loans as a percentage of total loans) amounted to 1.0% at end-March 2015. This level is underpinned by the bank's retail-oriented loan book which constituted 76% of gross lending at end-December 2014, largely in the form of mortgages.

Our assigned Asset Risk score indicates that, overall, asset risk remains a relative strength for Sparebanken Vest, notwithstanding its industry concentration to the real estate and construction sectors (together accounting for 12% of gross loans at end-December 2014) and the shipping sector (around 4% of gross loans), all of which have historically been characterised by higher volatility. In addition, Sparebanken Vest exhibits significant single-borrower concentration, common at Nordic banks, which in a stress scenario could accelerate the extent and pace of any deterioration in asset quality. We expect to see mild asset quality deterioration from its current position as we expect Norway to experience a somewhat tougher bank operating environment compared to recent years due to declining oil and gas prices, as well as falling investment levels.

#### MILD DETERIORATION IN PROFITABILITY CAUSED BY RENEWED MARGIN PRESSURE

Sparebanken Vest recorded an improved NOK1.493 billion pre-tax profit in 2014 (2013: NOK1.221 billion) mainly as a result of (1) increased income from payment transfers and increased commissions on insurance; (2) higher contribution from associated companies; and (3) the proceeds from the sale of shares in payment provider Nets AS.

Sparebanken Vest has actively established several product companies, enabling it to gain a foothold in life and non-life insurance (Frende Forsikring, 39.7% ownership), securities brokerage (Norne Securities, 47.6%), leasing (Brage Finans, 49.9%) and real estate agency services (Eiendomsmegler Vest 100%). The bank also owns 40% of Verd Boligkreditt, a covered bond company used by eight other independent savings banks for funding purposes in addition to its own 100%-owned covered bond issuing entity (Sparebanken Vest Boligkreditt AS). We expect these stakes to provide additional revenue streams for Sparebanken Vest in the future.

The third-party generation of products also improves bank efficiency, as measured by the bank's reported cost-to-income ratio, which remained strong at just over 44% at end-December 2014. This improvement reflects the efforts towards the rationalisation of the bank's operations, which were only partially offset by higher pension expenses as a result of falling interest rates. However, we do not expect further significant improvement in Sparebanken Vest's efficiency as it is already in line with those of other banks in the Nordic region. In 2014, loan losses were at NOK410 million, slightly higher than usual as the bank carried out several challenging restructuring processes in the corporate market portfolio.

The net income-to-tangible banking assets ratio averaged 0.7% for the three years to December 2014, and we expect only a mild deterioration from these levels as a result of additional margin pressure and uncertainty over provisioning levels as reflected in our assigned Profitability score. The bank reduced the interest rates on housing loans twice during 2014, and a further reduction was announced in the beginning of 2015 resulting in renewed margin pressure. Moreover, the bank will likely incur further loan losses from volatile segments such as real-estate and construction, albeit at a level that will have a limited impact on profitability.

#### RELIANCE ON MARKET FUNDING RENDERS THE BANK VULNERABLE TO FLUCTUATIONS IN INVESTOR SENTIMENT

Sparebanken Vest's funding position is underpinned by a strong deposit base, which accounted for approximately 50% of its total funding at end-December 2014, with almost 60% of the bank's deposits originating from the retail sector.

Market funding accounted for over 46% of the bank's tangible banking assets at end-December 2014. As reflected in our methodology, we reflect at a global level the relative stability of covered bonds compared to unsecured market funding through a standard adjustment in our scorecard. Our assigned Funding Structure score indicates that the overall funding profile remains a modest fundamental weakness for Sparebanken Vest because of its

inherent confidence sensitivity, and the potential for the availability and cost of market-based funding. This weakness is partially mitigated by good access to capital markets, including the Norwegian covered bond market (the bulk of the bank's outstanding debt consist of Norwegian krone- and euro-denominated covered bonds). Whilst we note positively that covered bond funding has helped Sparebanken Vest to extend its maturity profile, we also note the risk that the use of covered bonds could result in the structural subordination of the bank's unsecured creditors, including depositors.

Sparebanken Vest maintains a liquidity portfolio to cover short-term liquidity risks; at end-December 2014, liquid assets accounted for just over 14% of tangible banking assets. The liquidity portfolio was primarily invested in covered bonds and other investment grade rated bonds.

## **Notching Considerations**

### **LOSS GIVEN FAILURE AND ADDITIONAL NOTCHING**

We expect that Norway will seek to introduce legislation or other tools that include mechanisms similar to those in the EU's Bank Resolution and Recovery Directive (BRRD). We assume residual tangible common equity of 3% and losses post-failure of 8% of tangible banking assets, a 25% run-off in "junior" wholesale deposits, a 5% run-off in preferred deposits, and assign a 25% probability to deposits being preferred to senior unsecured debt. These metrics are in line with our standard assumptions.

Our upgrade of Sparebanken Vest's long-term deposit rating and senior unsecured ratings considers the likely impact on loss-given-failure of the combination of their own volume and the amount of debt subordinated to them. This has resulted in Preliminary Rating Assessment (PRA) of two notches above the BCA, reflecting very low loss-given-failure.

For junior securities issued by Sparebanken Vest, our LGF analysis confirms a high level loss-given-failure, given the small volume of debt and limited protection from more subordinated instruments and residual equity. We also incorporate additional notching for junior subordinated instruments reflecting the coupon features.

### **GOVERNMENT SUPPORT**

The expected implementation of resolution legislation has caused us to reconsider the probability that government support would benefit certain creditors.

Sparebanken Vest is the second-largest regional savings bank in Norway by total assets, and benefits from a sound market position in western Norway in the counties such as Hordaland, Sogn og Fjordane and Rogaland. We calculate that Sparebanken Vest's lending market share is around 20% in the county of Hordaland where the bank does most of its business. Therefore we expect a moderate probability of government support for debt and deposits, resulting in one notch of uplift.

For other junior securities, we continue to believe that potential government is low and these ratings do not include any related uplift. Junior securities also include additional downward notching from the BCA reflecting coupon suspension risk ahead of a potential failure.

### **COUNTERPARTY RISK ASSESSMENT**

We assign a Aa3(cr) long-term and P-1(cr) short-term CR assessment to Sparebanken Vest.

CR Assessments are opinions of how counterparty obligations are likely to be treated if a bank fails and are distinct from debt and deposit ratings in that they (1) consider only the risk of default rather than the likelihood of default and the expected financial loss suffered in the event of default and (2) apply to counterparty obligations and contractual commitments rather than debt or deposit instruments. The CR assessment is an opinion of the counterparty risk related to a bank's covered bonds, contractual performance obligations (servicing), derivatives (e.g., swaps), letters of credit, guarantees and liquidity facilities.

## **Foreign Currency Deposit Rating**

Sparebanken Vest's foreign-currency deposit ratings are unconstrained, given that Norway has a country ceiling of Aaa. The bank's foreign-currency deposit rating is A1.

## **Foreign Currency Debt Rating**

Sparebanken Vest's foreign-currency debt ratings are unconstrained, given that Norway has a country ceiling of Aaa. The bank's senior unsecured foreign-currency debt rating is A1.

#### About Moody's Bank Scorecard

Our Scorecard is designed to capture, express and explain in summary form our Rating Committee's judgment. When read in conjunction with our research, a fulsome presentation of our judgment is expressed. As a result, the output of our Scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The Scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for appraisal and rating services rendered by it fees ranging from \$1,500 to approximately \$2,500,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody's.com](http://www.moody's.com) under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

For Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a

debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail clients. It would be dangerous for “retail clients” to make any investment decision based on MOODY’S credit rating. If in doubt you should contact your financial or other professional adviser.

For Japan only: MOODY’S Japan K.K. (“MJKK”) is a wholly-owned credit rating agency subsidiary of MOODY’S Group Japan G.K., which is wholly-owned by Moody’s Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody’s SF Japan K.K. (“MSFJ”) is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization (“NRSRO”). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000. MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
